

# Model Exposition

Visualisation is the key to all creation and modelling is a way to present the same. It is a simplification of reality. Modelling is applied in the fields of aeronautics, automobile, picture, sociology, economics, software development and literally every other field that you can think of.

Through models we can not only validate our theories but also try out new ones with minimal risk and cost. To encourage this practice and so as to take significant steps in this direction we are organising our model expo.

## Detailed Guidelines are as follows:

1. Create a Model depicting a Civil Engineering Phenomena/Notable Civil Engineering Work/Innovative Idea in the Field of Civil Engineering.
2. Each institute will have to submit a detailed document highlighting expenses incurred to prepare the Model.
3. The model will be judged on the basis of the following criteria:
  - Creative Idea
  - Aesthetics and Economy
  - Degree of Innovation
  - The extent of details depicted in the Model
  - Awareness about field depicted by Model
  - Portfolio of the Model presented
4. Each Institute will be represented by a team of 3 Members.
5. Responsibility of Logistics will be of the institute itself and Model has to be made keeping the same in mind.
