

Research Work Presentation

“The best insurance policy for the future of an industry is research, which will help it to foresee future lines of development, to solve its immediate problems, and to improve and cheapen its products.”

Research is what propels humanity forward. It's fuelled by curiosity: We get curious, ask questions, and immerse ourselves in discovering everything there is to know. Learning is thriving. Decades of research have led us to where we are today i.e. a civilised and modernised society with the knowledge and tools to move forward.

Research Work Presentation is a step ahead to promote the culture of research among undergraduates and postgraduates alike.

This event is being conducted in three parts:

M.Tech. Dissertation Work Presentation*:

One student from each Institute will be giving a detailed presentation about his Dissertation highlighting the Objective of the study, Research methodology, Interpretation of Results & Conclusion and the Scope of Improvement.

In the first step, Each participating institute will have to submit a brief abstract (400 words) about the Dissertation to be presented latest by 29th February.

*Dissertation need not be complete. Current work can also be presented.

PhD Research Work Presentation

One Research Scholar from each Institute will have to give a detailed presentation on Area of research highlighting the Objective, Methodology, Results, Interpretations and Future Recommendations.

Similar to the previous one each participating institute will have to submit a brief abstract (400 words) about research work to be presented latest by 29th February.

Undergraduate Research Work Presentation

One UG Student from each Institute will have to give a detailed presentation on his area of research highlighting the topic, its significance, findings and scope of improvement.

Each participating institute will have to submit a brief abstract (300 words) about research work to be presented latest by 29th February.
